

PinnyCards

A free classroom tool by PinnyBinny

Before you print all cards...

The PDF contains **50 unique response cards**, but you only need to print as many as your class requires. Print individual pages or the entire set—it's up to you.

We recommend printing **just one test page first** to make sure everything works correctly with your printer.

Start with ONE test card

Printing settings

- Print at 100% (Actual Size).
- Do not use Fit to page or any scaling.
- Print on A4 paper.

Assemble the test card

1. Cut out the card.
2. Fold it along the center line.
3. Hold the card together.

Test it

Open PinnyCards on your phone and scan the card.

Make sure the marker is detected instantly and the selected answer matches the card orientation.

If everything works correctly, print the remaining pages.

Tips

- For longer life, print on thicker paper (160–250 g/m²) or laminate the cards.
- For best results, use white paper.
- If your PDF viewer has printing issues, try printing from your web browser (Chrome, Edge, or Firefox).
